

KEENOVA-WIRE SAW MACHINE

High-Performance Wire Saw Solutions for Quarrying and Construction Cutting

KEENOVA Wire Saw Machines are engineered to deliver powerful, efficient, and reliable cutting performance for natural stone quarrying and construction applications. Featuring advanced drive technology, intelligent control systems, and robust machine construction, they provide exceptional productivity, operational stability, and low ownership costs in the most demanding site conditions.

1 Technical Specifications:

Model No#	Main Motor	Speed Setting	Diam of Drive Wheel	Application	Remark
WSM-22KWS	22KWS/30HP	0-40M/S	600MM	Block trimming	Power Standard: 3phases, 380-440volts, 50/60Herz Available Options for Standard Motor Driven or PM Motor Driven
WSM-37KWS	37KWS/50HP	0-40M/S	800MM	Quarry Bench Cutting / Construction Cutting	
WSM-45KWS	45KWS/60HP	0-40M/S	800MM		
WSM-55KWS	55KWS/75HP	0-40M/S	800MM		
WSM-75KWS	75KWS/100HP	0-40M/S	800MM		

2 Key Features:

► High-Power Drive System

Equipped with high-efficiency motors and advanced inverter control technology, delivering stable power output and optimum cutting performance under varying load conditions.

► Intelligent Inverter and PLC Automatic Control System

User-friendly control interface with adjustable cutting parameters, real-time monitoring, and automatic protection functions for enhanced productivity and operational safety.

► Automatic Constant-Tension Control

Maintains optimum wire tension throughout the cutting process, improving cutting efficiency, extending wire life, and ensuring smoother operation.

► Heavy-Duty Machine Structure

Robust steel construction provides exceptional stability, durability, and reliability in demanding quarry and construction environments.

► Precise Automatic Feeding System

Ensures smooth machine travel and consistent cutting performance, helping maximize productivity and cutting accuracy.

► Compatible with Standard & PM Motor Technology

Available in configurations for both conventional motor-driven and high-efficiency permanent magnet (PM) motor drive systems to suit different application requirements.

► Easy Maintenance & Serviceability

Modular design, easy accessible brand components, and simplified maintenance procedures help minimize downtime and reduce operating costs.

3 Why Choose KEENOVA?

With extensive experience in diamond wire technology and quarry equipment, KEENOVA provides reliable, high-performance wire saw solutions designed to maximize productivity and minimize operating costs. Our machines are globally trusted by quarry operators and cutting contractors for their durability, efficiency, and long-term value.
